## **CYPRESS CARE SUCCESSFULLY COMPLETES SAS 70 TYPE II EXAMINATION**

**Atlanta – February 10 , 2009** – Cypress Care, a Healthcare Solutions company, announced today that it successfully completed an American Institute of Certified Public Accountants (AICPA) SAS 70 Type II examination. The report completed at the conclusion of the audit noted no exceptions. In completing the examination through an independent auditor, Cypress Care established its adherence to one of the most stringent, industry-accepted auditing standards for service companies.

“Cypress Care’s decision to undergo the SAS 70 Type II examination provides our customers with an assessment of our environment by an independent auditor in order to validate the company’s industry leading technology and operational practices,” said Chuck Cavaness, chief information officer for Cypress Care. “The examination included design assessments and operating effectiveness tests of the system’s infrastructure, physical network security, maintenance procedures, infrastructure change management, problem management, reporting control procedures and environmental safeguards.”

SAS 70 certification validates that a service organization has completed an objective, in-depth audit of its information control activities, which include controls over information technology processes. A Type I report describes the service organization's description of its controls at a specific point in time. A Type II report not only includes a description of the controls, but also includes a detailed testing of those controls.

The Type II certification achieved by Cypress Care provides assurance to customers that adequate logical, physical and environmental controls are operating effectively. The examination can be used by clients during audits of their own financial statements.

“The SAS 70 certification reflects the organization’s unwavering commitment to provide only the highest standards of service to our customers,” said David A. George, CEO of Cypress Care. “SAS 70 is the emerging industry standard and we are proud to have completed the Type II certification process with no exceptions, a very impressive accomplishment.”

In addition to SAS 70 examinations, Cypress Care also complies with the Health Insurance Portability and Accountability Act (HIPAA) requirements for healthcare data privacy and protection.
